

Mr. Brian Flannigan Joins FilterBoxx Water & Environmental

Calgary, Alberta (November 14th, 2011): Mr. Kevin Slough, Chief Executive Officer of FilterBoxx Water & Environmental Corp. ("FilterBoxx" or "the Corporation") is pleased to announce the appointment of Mr. Brian Flannigan as Vice President of Chemical Systems of the Corporation. Mr. Flannigan is a veteran of the chemical industry having valuable experience in a senior role at Nalco Company ("Nalco").

"I'm excited to have Brian join our team. With his experience in the chemical industry, he will be instrumental in the development of our new chemical systems business utilizing FilterBoxx proprietary bio-feed stock based chemistry" comments Mr. Slough

Mr. Flannigan began his tenure with Nalco in 1979; he has extensive sales, marketing and business development experience in the specialty chemical industry. His career with Nalco spanned assignments from field sales and sales management. Most recently, he led the senior level leadership of industrial outsourcing activities. In his role as Regional Director, Mr. Flannigan was directly responsible for business development and operations of Nalco's integrated equipment and service business in North America and Mexico. In his role of Vice President Chemical Systems at FilterBoxx, Mr. Flannigan will oversee all aspects of product and systems development, production, distribution and sales.

"I am delighted to join the team. The potential for continued growth in the Oil & Gas sector as well as new markets is substantial. FilterBoxx has become the benchmark for equipment quality and service by focusing on customer needs and satisfaction. I expect that this commitment will be the foundation of future market and product development" comments Mr. Flannigan.

About FilterBoxx Water & Environmental Corp.

FilterBoxx Water and Environmental Corp. is a private company and leading provider of packaged potable water and wastewater treatment systems to drilling, mining and pipeline camps, small municipalities, resorts and aboriginal communities. Through our rental fleet and capital sale program, FilterBoxx addresses some of the most mission critical processes and industrial water treatment requirements of major oil and gas producers such as SAGD water reuse, boiler feed water treatment, and metals removal.
